KAUSHAL RANASINGHE

Associate Data Engineer | Python & SQL Specialist
Colombo, Sri Lanka | +94 71 912 3287 | kaushalranasinghe@gmail.com linkedin.com/in/kaushal-ranasinghe-3bb7021a1

PROFESSIONAL SUMMARY

Associate Data Engineer with hands on production experience writing SQL against live PostgreSQL databases and building Python based data pipelines for a Microsoft Azure ISV partner delivering AI SaaS products to the hospitality industry. Comfortable working across the full data lifecycle collection, storage, querying, and reporting using Python, SQL, Pandas, and Apify, alongside backend development in FastAPI and Flask. Built an automated analytics report generator combining SQL query design (psycopg2) with Python driven visualization (matplotlib) for CEO level client reporting, and contributed backend and QA work to production WhatsApp based hotel guest platforms deployed on Microsoft Azure. Currently completing a Pearson BTEC HND in Computing (Software Engineering), with an IBM certification in Python for Data Science and AI.

TECHNICAL COMPETENCIES

SQL & Databases - Production SQL query writing and troubleshooting on PostgreSQL, order analytics queries, guest data management queries, MySQL, MongoDB, psycopg2 for Python to SQL data pipelines

Python & Data Engineering - Python, Pandas, ETL scripting, Apify based web scraping, BeautifulSoup, Selenium, automated report generation, python docx, matplotlib

Backend & APIs - FastAPI, Flask, REST API development, backend workflows for user enrolment, guest data, and order management

Cloud & DevOps - Microsoft Azure, Azure DevOps Server, Azure OpenAI, Azure Web Apps, Docker, GitHub Actions, CI/CD

Monitoring, QA & Tools - Datadog, Jira, Twilio, structured QA test case design (95+ documented test cases), Microsoft Office

PROFESSIONAL EXPERIENCE

Associate Data Engineer **Nov 2024 - Jul 2026**
Insights.ai Pvt Ltd (iPhenTech) - Colombo, Sri Lanka

- Wrote and troubleshot SQL queries against production PostgreSQL databases for order analytics and hotel guest data management, directly supporting live client facing systems.
- Built an automated hotel performance analytics report generator combining SQL data extraction (psycopg2), Python data processing, and matplotlib visualization for CEO level client reporting.
- Developed Python web scraping pipelines using Apify to collect and structure day by day competitor hotel pricing data for a price intelligence initiative.
- Developed and maintained backend features for Hello-AI and Consolid-AI using Python, FastAPI, and Flask, including hotel user enrolment, guest information management, and order management workflows integrated with the live chat system.
- Monitored production systems using Datadog and tracked development work through Jira; used Docker, GitHub Actions, and Azure DevOps for CI/CD across services hosted on Azure Web Apps and Azure OpenAI.
- Designed and executed structured QA coverage across the Hello-AI web dashboard, WhatsApp chatbot, and staff mobile app, producing Excel test case workbooks with 95+ documented test cases.
- Populated and configured demo dashboards for hotel clients, covering marketing content, room management, and guest information fields.

Tech Stack: Python, SQL, PostgreSQL, psycopg2, Pandas, Matplotlib, Apify, FastAPI, Flask, Azure OpenAI, Azure DevOps, Docker, GitHub Actions, Datadog, Jira

KEY PROJECTS

Hotel Performance Analytics Report Generator
Python | SQL | PostgreSQL | psycopg2 | Matplotlib | python-docx

- Built an automated reporting pipeline that queries PostgreSQL directly via psycopg2, aggregates hotel performance data, and generates formatted CEO level client reports combining SQL derived metrics with Python-generated charts.

Hotel Price Intelligence Data Collection Pipeline
Python | Apify | Google Travel | Data Collection

- Built Python scraping scripts using Apify's Google Travel hotel prices actor to collect and structure day by day competitor pricing data.

Web Scraping & Data Analysis
Python | Apify | Data Analysis

- Created Python and Apify scripts to collect structured and unstructured data and analyzed the resulting datasets to extract meaningful insights.

Hello-AI Automated Food Ordering via WhatsApp
Python | Azure OpenAI | Streamlit | WhatsApp

- Implemented an automated WhatsApp food ordering system for a Singapore based food and logistics company, using Azure OpenAI to interpret and format customer orders and a Streamlit dashboard for real time order tracking and management.

Consolid-AI Hotel Guest Chat Admin Panel
Python | FastAPI | Flask | Backend APIs | SQL

- Contributed backend features and SQL backed data workflows for hotel user enrolment, guest information management, and order management within the company's hotel guest chat admin application.

COMPANY PORTFOLIO - IPHENTECH

Insights.ai operates under iPhenTech, a Microsoft Azure ISV partner building production AI SaaS products for the hospitality and manufacturing sectors:

- Butler – AI powered hospitality concierge platform live across 4 five star hotels, processing 9,500+ AI interactions per hotel per month via web, mobile, and WhatsApp channels.
- L4M (Looma for Manufacturing) - AI manufacturing intelligence platform deployed at MAS Holdings, the largest apparel manufacturer in Southeast Asia.

EDUCATION

Pearson BTEC HND in Computing (Software Engineering)Feb 2026 Sep 2027- **(Part Time)**
ESOFT Metro Campus

Foundation Certificate in Software EngineeringJun 2022 Jun 2023- University of Westminster

CERTIFICATIONS

- Python for Data Science and AI - IBM (Issued May 2026)
